

MODEL BH-4

Bobbin Winding Machines

Model BH-4 bobbin winder shown.

MAJOR FEATURES

- New Winder BH is revolutionary winder for controlling line tension equally with High-Speed from the beginning of winding (center core) to the end of winding (outer circumference) of the bobbin, which is achieved by synchronized controlling both Feeding Roller(for supplying of line) and Turn Table driving Motor. Turn Table Motor is torque constantly controlled by latest inverter system

Features

- Increase by 60% productivity compare to B-2(Conventional Model)
- Sideways Spool Feeding System: Automatic Constant Winding Tension Control
- Countertype for Whole-Lot Bobbin Change System
- Optimum Torque-Controlled Winding Motor
- Line Speed Control(330-560m/min)
- Fiber-Optics Automatic Stop function
- Length Counter

MODEL	BH
Number of Spindle	2 ~ 6
Motor/Spindle	0.2kw
Line Speed	330 ~ 560m/min
